

Dzhalil Kalimov

Frontend Developer (Vue.js 3 / React.js)

fujuroa@gmail.com • +7 747 500 1246 • [LinkedIn](#) • [GitHub](#) • [Telegram](#) • [Website](#) • Almaty, Kazakhstan

Frontend Developer with 3 years of experience in Fintech (banking sector) and Web3. Proficient in Vue 3 and React/Next.js: I build microfrontends with Single-SPA for internal banking systems (300,000+ clients), including integrations with government platforms. I specialize in performance optimization (reduced build times by 10x) and complex integrations (Web3 wallets, logistics services). Proven business impact: 23% growth in SEO traffic (Google Search Console).

Experience

[KMF Bank JSC](#), a commercial bank in Kazakhstan serving 300,000+ clients through a nationwide branch network.

Almaty, Kazakhstan

Frontend Developer

April 2026 – Present

Developed the Bank Office System and internal systems as part of a 20-person team within the digital development department (40+ specialists). Worked in Scrum with two-week sprints.

- Designed and extracted 4+ key modules into Single-SPA microfrontends from a Vue 3 monorepo, splitting ownership between teams and accelerating the release cycle through isolated builds and independent deployments.
- Introduced integration tests with Vitest and MSW for the extracted microfrontends, covering key user scenarios and reducing regression risk during independent deployments.
- Developed banking systems, including an integration with SmartBridge – the government platform for data exchange between state agencies and businesses in Kazakhstan; the solution successfully passed regulatory review.
- Worked closely with POs, QA, designers, business analysts, backend developers, and business stakeholders, ensuring development transparency and fast feedback loops between teams.

[STAKEME LLC](#), A blockchain infrastructure company and validator serving 18,000+ users across 35+ networks.

Remote

Frontend Developer

December 2024 – January 2026 (1 year 2 months)

Contributed to a multi-project blockchain explorer platform for 35+ projects with multi-environment support. Conducted code reviews and refactored legacy code and components. Introduced a design system, standardizing UI development across projects.

- Brought the company's services to the top of search results through in-depth SEO optimization.
- Built internal services supporting CRUD operations for user-facing services [Labs](#)
- Cut project build and compilation times by migrating from Next.js 14 (Webpack, ~10-minute builds) to Next.js 15 (Turbopack, ~1-minute builds, ~5-second page compilation), speeding up development and delivery.
- Integrated MetaMask, Keplr, and other crypto wallets, improving the company validator's conversion rate.
- Developed new feature pages and optimized interfaces across [projects](#), improving the usability and consistency of the platform. Refactored legacy modules and conducted code reviews

[DragAu](#), A company building custom software for business optimization and scaling, 20+ clients.

Almaty, Kazakhstan

Frontend Developer

March 2024 – December 2024 (10 months)

Built and scaled an administrative platform for a restaurant chain in Almaty covering 15+ restaurants, with loyalty programs, digital menus, and Yandex.Delivery integrations, supporting 1,000+ orders per month through a centralized management system.

- Developed and launched the city-wide administrative platform [Ozo.direct](#) for 15+ restaurants across Almaty, implementing a multi-tenant architecture and centralized management tools.
- Increased customer retention for partner restaurants by 13% by introducing a unified loyalty and bonus system.
- Streamlined restaurant operations by integrating digital menus and Yandex.Delivery, enabling automated processing of 1,000+ orders per month.

Frontend Developer

February 2023 – March 2024 (1 year 2 months)

Developed the college's web platforms with React and Next.js, participating in the full cycle – from interface design to production.

- Built and shipped Attendix – an internship attendance tracking system with daily QR verification for 500+ users (students, teachers, partner companies); eliminated manual reporting and increased actual attendance by 26% according to internal statistics.
- Implemented an admin panel with role-based access control (RBAC), analytics, and real-time attendance monitoring.
- Integrated the frontend with a Strapi-based backend API: authentication, attendance business logic, and administrative workflows.
- Additionally built several Telegram bots and web applications for internal college needs.

Certificates

- Halyk Bank OIY Hackathon [\[LINK\]](#), October 2023
- Course "Applied Information Security Technologies", Zhejiang College of Security Technology [\[LINK\]](#) June 2025
- 1st place diploma, WorldSkills Almaty championship "Web Technologies" [\[LINK\]](#) March 2025
- 2nd place diploma, WorldSkills Kazakhstan championship "Web Technologies" [\[LINK\]](#) December 2025

Education

Almaty Polytech College

Kazakhstan, 2023-2027

Vocational diploma in Software Development

Skills

Stack

TypeScript, JavaScript, HTML5, CSS3, SASS/SCSS

Frameworks & Libraries

React, Next.js (App Router, SSR/SSG/SPA), Vue 3 (Composition API), Vue Router

State Management

Redux, Zustand, Pinia

UI & Styling

Tailwind CSS, shadcn/ui, PrimeVue, Storybook, accessibility (a11y)

Architecture

Microfrontends (Single-SPA), component-driven development, design systems

Tooling & DevOps

Git, GitHub, GitHub Actions, CI/CD, Docker, Webpack, Turbopack, Vite, Sentry, Grafana, Jira, Linear, Ethers.js, wallet integrations (MetaMask, Keplr)

Testing & API

REST API, authentication/authorization, RBAC, Jest, React Testing Library, Vitest, Mock Service Worker

Languages

Russian, Native speaker

English, Upper Intermediate (B2)

Chinese, Elementary (HSK2)
